Subject: Keep Salt Point Open To Recreational Fishing

Dear Sirs,

I would like to act as spokesman for one of the oldest and largest dive clubs in the state of California and also as a citizen and fisherman to voice my views to the proposed changes that you are deciding on. It is my understanding that a part of Salt Point State Park including Fisk Mill is being considered for the MLPA. Please do not close down that area or any park area in the future. We live in a state that borders the ocean, yet we as citizens already have very little access to the water in comparison to the length of the state. To take away park access when so much of the rest of the state could be used for the protection of our fish stocks would seem like you are punishing the very people that the parks are built for. Please, please reconsider the area in question.

Thank you,

Fred Cochran - Treasurer
